FULL STACK SOFTWARE ENGINEER

PROFILE SUMMARY

Full Stack Software Engineer with 2+ years of experience developing enterprise web applications using ASP.NET Core, React, SQL Server, and AWS. Experienced in designing REST APIs, building responsive frontend applications, integrating enterprise platforms, and supporting production systems. Hands-on experience with Entity Framework Core, JWT authentication, PostgreSQL, Docker, and Agile development practices. Strong foundation in backend engineering with a focus on scalable, secure, and maintainable applications.

EXPERIENCE

Associate Software Engineer

May 2024 – Present

Hexaware Technologies

Pune, MH

- Develop and enhance enterprise applications for Carlyle's LP Connect platform across 5+ business modules, including Wire Form, Self Service, Dataroom and Reporting.
- Develop REST APIs and backend services using ASP.NET Core, Entity Framework Core and SQL Server, typically delivering 2–3 APIs per month based on business requirements.
- Build reusable React components and frontend workflows for enterprise business modules.
- Integrate enterprise platforms including Auth0, Salesforce, Appian and EBX MDM to support secure authentication and business workflows.
- Utilize AWS services including Lambda, S3, ECS, RDS and CloudWatch for application deployment and monitoring.
- Investigate production issues including integration failures, perform root-cause analysis and support reliable production releases.
- Contribute within a 15+ member Agile engineering team following a biweekly release cadence.
- Use AI-assisted development workflows with Cursor AI for implementation, debugging, impact analysis, testing and documentation.

AI Intern

Dec 2021 – Feb 2022

NeoDocto

Remote

- Developed AI models for healthcare document analysis and intelligent prediction.
- Built preprocessing pipelines for structured and unstructured medical datasets.
- Improved document verification workflows using computer vision and machine learning techniques.

Software & AI Intern

Sept 2021

LinuxWorld Informatics Pvt Ltd

Jaipur, RJ

- Developed CNN-based vehicle recognition models for computer vision use cases.
- Implemented neural network algorithms for image classification.

PROJECTS

HotPot – Online Food Ordering Platform | .NET Core, React, MSSQL, C#, JWT

Jan 2024 – Mar 2024

- Developed a full-stack web-based food ordering platform supporting menu browsing, cart management, order placement and delivery workflows.
- Built a React frontend and .NET Core backend with JWT-based authentication and role-based access.
- Implemented Redux for centralized application state management across customer workflows.
- Developed REST APIs and database components for menu, cart, address and order workflows using MSSQL and Entity Framework Core.

Maverick Certification Hub | Next.js, AWS Bedrock, AWS Cognito, Neon DB

2026

- Built an end-to-end automation platform for corporate certification drives, streamlining eligibility validation and voucher processing workflows.

- Implemented a custom eligibility rules engine and automated certification workflows to reduce manual voucher processing errors.
- Integrated AWS Cognito for secure authentication and AWS Bedrock (Nova 2 Lite) for intelligent workflow automation and analytics.
- Architected full-stack Next.js APIs with a Neon DB backend and developed real-time pass-rate and ROI analytics dashboards.
- **Runner-Up – Hexaware Maverick Designathon 2026**, developed within a 48-hour engineering cycle.

ReleaseRadar | .NET 10, React, PostgreSQL, GitHub API, Docker, AWS

May 2026 – Jul 2026

- Developed a developer release intelligence platform integrating source control activity, pull requests, deployments and environment health into a unified release view.
- Built ASP.NET Core REST APIs to aggregate repository activity, release readiness, deployment history and environment status.
- Integrated GitHub APIs to correlate pull requests, commits and release changes with deployment workflows.
- Developed React dashboards for engineering teams to monitor release readiness, deployment status and historical changes.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, SQL
Frameworks & APIs: ASP.NET Core, .NET, React, Next.js, Entity Framework Core, Redux, REST APIs
Databases: SQL Server, PostgreSQL, Neon DB
Cloud: AWS (Lambda, ECS, S3, RDS, CloudWatch)
Developer Tools: Git, GitHub, Docker, Swagger, Postman, Cursor AI
Concepts: JWT Authentication, Clean Architecture, Dependency Injection, Microservices, Agile, CI/CD, Production Support

EDUCATION

S.N.J.B. Late Sau. Kantabai Bhavarlalji Jain College of Engineering
Bachelor of Engineering in Computer Science – 8.88 CGPA
Sanjivani Junior College
Higher Secondary Certificate (12th) – 79.8%
Samata International School
Secondary School Certificate (10th) – 91.2%

Chandwad, MH
Aug. 2019 – Aug. 2023
Kopargaon, MH
2017 – 2019
Kopargaon, MH
2017

CERTIFICATIONS & TRAINING

- Microsoft Azure Fundamentals (AZ-900)
- **Claude Certified Developer - Foundations** – Anthropic — Aug 2026
- **Claude Certified Associate - Foundations** – Anthropic — Aug 2026
- Runner-Up – Hexaware Maverick Designathon 2026
- AWS AI Learning Track
